

Art Knowledge Organiser - Textiles

Key question: How can architecture inspire a print for fabric?

Key Vocabulary

linear, selecting, structure, relief printing, multiple, response, transposing, designs, graphic, adapt, batik, modify, Tjanting, resist, wax

Skills

To collect and select visual information and develop ideas.

To develop design for a relief print

To use relief printed textile processes to communicate ideas and observations

To develop and apply batik designs.

Facts

- **Relief printing** is a **process** consisting of cutting or etching a **printing** surface in such a way that all that remains of the original surface is the design to be **printed**.
- **Dip Dyeing Fabric** involves submerging your **fabric** into a bucket or vat of **dye** to make it a different color.
- Batik is an Indonesian technique of wax-resist dyeing applied to whole cloth. This technique originated from Java, Indonesia. Batik is made either by drawing dots and lines of the resist with a spouted tool called a tjanting.
