Foundation Work (for the week)

Science– due Friday at 12pm

This week we are going to be doing a science topic. We thought it would be interesting for you to learn about the different roles organs play in our bodies!

Your task is to research all about organs and using the tools on purple mash, create an information text about the vital organs in the human body. For example: The pancreas is an organ located in the abdomen. It plays an essential role in converting the food we eat into fuel for the body's cells. It has two main functions: an exocrine function that helps in digestion and an endocrine function that regulates blood sugar.

Diary

Write a diary of what work and activities you did today. Remember to include your emotions and opinions.
